CHANGING THE WAY THE WORLD MOVES

Company Overview

Smart Move is an asset management company that provides a unique, revolutionary, and increasingly popular alternative method of transporting household and commercial goods securely and on a time guaranteed basis. The company uses a GPS equipped, proprietary shipping container, the SmartVault™, to execute the movement of goods and utilizes its technologies to efficiently manage the fleet of assets. Smart Move currently offers moving services available to over 92% of the USA population from its operations in the 61 largest U.S. metropolitan areas in the USA. Logistics are handled via the terminals of our primary transportation provider UPS Freight. Our business model offers specific competitive advantages over the traditional van line agencies that perform the majority of the long distance moves in the U.S. today through: superior security, scheduling flexibility and expedited service. The company automatically includes full coverage insurance for its customers, a unique feature of its offering within the asset transport industry.

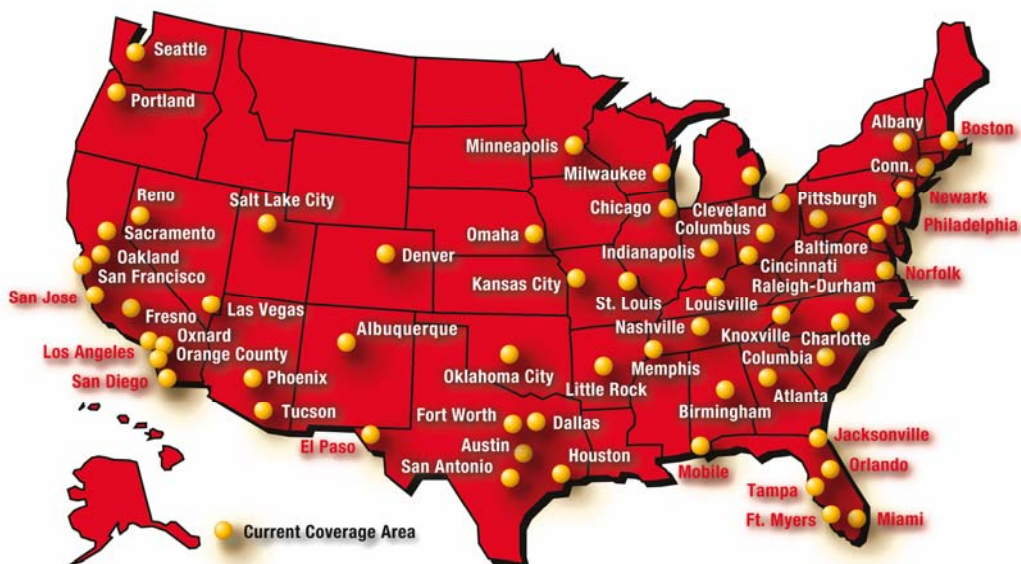

What Kind of Move Are You Making?

Smart Move provides a full spectrum of moving solutions for residential and commercial moves. Whether you are a young professional making a cross-country move for a new job, a business moving high value cargo, a human resources professional in need of an accountable partner for corporate relocations, or a homeowner in search of peace of mind to ease the stress of moving, Smart Move has a solution for you.

Smart Move Benefits

- Smart Vault Technology, GPS tracked
- Flexibility to Move on Your Schedule
- \$10,000 worth of Insurance per SmartVault™ utilized
- UPS Freight – Secure Pick Up and Delivery
- Eliminates Loss and Theft
- Trusted Sources Handling Your Entire Move

Smart Move Coverage Area

SmartVault™ Technology

The key to Smart Move's innovative moving and storage solutions is the SmartVault™, a conveniently sized, weather-resistant container that can be packed easily and protects your assets from shifting and damage during moving. Simply order the SmartVaults™ you need, load them yourself or Smart Move can provide full service packing and loading, then the vaults are secured with your own padlock and UPS Freight places an additional security seal on the vault upon pick up.

- Compact, Durable Construction
- GPS Tracking
- Locking Security
- Neutral Coloration
- Easy Ground Level Loading

More Secure

Each SmartVault features Smart Move's innovative locking system. You control access to your SmartVaults by securing them with your own padlock. Smart Move then seals them, ensuring that no one except you can open them while in transit. The goods are touched once, loss and theft are eliminated 100%. Each SmartVault™ features its own GPS tracking unit so we always know the location of your valuables.

SmartVault™ Features

- Compact Dimensions of 7 x 6 x 7
- 262 Cubic Feet of Space
- 7 Slide Lock Security System
- Semi-Translucent Roof
- Tie-Down Bars to Secure Assets with Ropes
